

PRESS RELEASE

John Mills Electric Sparks Excitement Again

Named on 2025 Top Solar Contractors List by Solar Power World

ELMIRA HEIGHTS, NEW YORK – August 2025 — For the sixth consecutive year, John Mills Electric has been named one of the Top Solar Contractors in the United States by Solar Power World magazine, a nationally respected publication that honors excellence and leadership in the solar industry. This repeat recognition highlights John Mills Electric's continued momentum in the renewable energy sector, with an ever-growing portfolio of successful solar installations across Upstate New York and Northern Pennsylvania.

"To be honored six years in a row is not only humbling, but also a testament to our team's craftsmanship, innovation, and unwavering dedication to building a cleaner energy future," said George Denmark, President of John Mills Electric. "We've continued to invest in training, safety, and technology — and it's paying off for our clients and our communities."

The Top Solar Contractors List, curated by Solar Power World, ranks the most impactful solar companies nationwide based on kilowatts installed in the previous year. John Mills Electric has been proudly helping businesses, homeowners, and community solar developers harness solar energy as part of its comprehensive electrical services since expanding into renewables over a decade ago. In 2024, the company installed 57,030.24KW of solar.

Founded in 1978, John Mills Electric has grown into a premier full-service electrical contractor, offering expert solar installations alongside residential, commercial, and industrial services. As demand for clean energy continues to rise, John Mills Electric remains committed to delivering trusted, high-quality solutions that meet the needs of today and tomorrow.

"As the solar industry evolves, we remain focused on providing safe, advanced solutions that benefit our clients, their bottom line, and the environment," added Denmark.
